be our partner in your student's success

Making A Difference. It is our belief that students benefit from conversations with their parents pertaining to alcohol and controlled substances. You can contribute to your student’s success by having this discussion and reviewing the Alcohol and Controlled Substance Policy and Procedures online module with your student.
Missouri S&T students are less likely to consume alcohol than other Missouri college students. On average, 79% of Missouri college students consume alcohol, while at S&T only 73% have consumed.

Most S&T students refrain from making risky decisions - 93% of students who drink alcohol drink slowly instead of chugging and use a designated driver. Most students choose not to binge drink, and 98% don’t use fake IDs.

Missouri S&T students look out for one another - 90% of S&T students say that they would step in and do something if a friend was drinking to the point of hurting him or herself.

Data from: 2012 Missouri College Health Behavior Survey

Dear Missouri S&T Family Member:

The faculty and staff of Missouri University of Science and Technology work hard to promote a healthy and positive educational environment in which student learning and development can flourish. As part of this commitment to creating an environment that promotes continual growth, the University of Missouri System has adopted a Parental Notification of Alcohol and Controlled Substances Violations policy, which allows for increased collaboration on issues pertaining to alcohol and controlled substance use.

At Missouri S&T, we believe that students benefit from discussions with their parent(s) or legal guardian(s) about the effects of alcohol and/or controlled substance use, including the effect on their educational experience. As our partner, we encourage you to discuss and complete the Parental Notification online module with your student. This module is accessible from the Student Affairs website at http://stuaff.mst.edu by simply clicking on the 'Parental Notification Module' button in the top, right corner. Finally, please encourage your student to complete the eCHECKUP TO GO module which will be distributed to his or her University e-mail account later this month. This module will help your student make informed choices with regard to individual alcohol consumption.

Warmest regards,

Cheryl B. Schrader, Ph.D.
Chancellor

ACTION ITEMS TO COMPLETE WITH YOUR STUDENT:
1. Parental Notification Module
2. Discussion Items
3. eCHECKUP TO GO online module
