Information Technology (IT) provides comprehensive technology services that are integral to teaching, learning, research, and other important campus functions. IT works with student government, the Library, Student Life, Student Success Center, and other units on campus to ensure the services and support needed for student success are available. The IT Help Desk in the Library is the easiest way for students to get the help they need. After hours, technology questions can be submitted online at <http://help.mst.edu>.

The most popular services used by students include:

Email and Google Apps for Education – Every enrolled student is provided with a Gmail account and access to the S&T Google Apps for Education services. Visit <http://it.mst.edu/services/google-apps/> for more information on how to get started.

Computer Learning Centers (CLCs) – Hundreds of computers in dozens of locations in every academic building, the library and student center are provided to support student learning. A large selection of software is available in every location, and discipline-specific software is available in some locations. Printers are located in every CLC. See <http://edtech.mst.edu/clc> for more information.

Printing – Students are given an allocation in the print management system (PaperCut) that meets most students' printing needs each semester at no additional cost to the student. Once this allocation is used, students can purchase additional quota points at the IT Help Desk in the Library. Visit <http://edtech.mst.edu/clcprint> for more information.

WiFi Access – Wireless network coverage is provided in every building and most common areas of campus. Due to the importance of wireless access for the growing number of personal mobile devices, IT works to continuously improve the coverage and bandwidth for the campus community. Visit <http://it.mst.edu/services/wireless/> to learn how to connect to S&T wireless services.

Learning Technologies – Missouri S&T is in the process of transitioning the learning management system during Summer/Fall 2016. The learning management system is used by many courses to deliver class materials, conduct class discussions, post assignments, and other class activities. More information about these activities will be announced throughout the fall semester. In addition, IT and EdTech partner with academic departments to support effective use of technology in the classroom and online. Student response systems (aka clickers) are used in a large number of first and second year courses. Students can find self-help materials for these technologies at <http://edtech.mst.edu/support>.

Student Honor Code

Student Honor Code

Approved by Student Council; April, 2011

We the students of the Missouri University of Science and Technology support this honor code to represent our ideals and values as individual students as well as a unified student body. We shall hold ourselves to a high standard of integrity both on campus and off, seeking to uphold this high standard of conduct and encourage such attitudes and actions in others.

We believe that the most important aspects of a strong moral code are based in Honesty and Respect. These values are defined as followed:

Honesty: In the ideal student, honesty is represented by the attitude of individuality. This is represented by a student constantly striving to perform all work themselves and to credit all statements, ideas, references, and etc. where it is due. A student also has the responsibility to ensure prevention of any academic dishonesty (i.e.: cheating, copying homework, etc.). A student must also refrain from using any sources or methods of completion that are unadvised and/or forbidden by individual instructors or campus standards. Lastly, Honesty is intrinsically based on Respect which is our next core belief in this honor code.

Respect: Respect is important in every aspect of life. In this Campus it is vital for every student to respect themselves, other students, and all university employees. This entails accepting and obeying requests by campus officials and instructors so long as said request is within the proper bounds of their position. This also involves respecting the opinions and differences of other students as well as seeking to understand their differences rather than cause conflict. Students must also respect the educational processes of this campus. This includes instructor's lessons, other student's study habits or performance, as well as any other act that could have a negative impact on some form of intellectual development. Students should show humility in regards to any successes achieved, as well as maintain professionalism when dealing with disagreements.

We, as students, recognize that by following this honor code, we are representing the ideals of the Missouri University of Science and Technology. Through these ideals, we strive for self-improvement in both our character and intellect. We look to better our lives and the lives of those around us, and realize that with these simple values, there is no limit to what we can achieve.

Student Rights, and Responsibilities

Student Rights and Responsibilities

Missouri S&T strives to provide an environment that develops and inspires creative thinkers and leaders for lifelong success. All members of the campus community share the responsibility to create general conditions conducive to learning. Missouri S&T embraces diversity and provides a unique academic and social environment where students enjoy the right to learn in an environment that is free from discrimination, both within and outside of the classroom. Students who have a concern about a possible violation of their rights, may seek assistance from one of the following resources: the Institutional Equity, Diversity and Inclusion Office for Title IX other forms of discrimination, the Dean of Students Office for concerns related to community standards, or the Academic Deans' offices for concerns related to faculty or academic matters.

Consequently, students must adhere to community standards in accordance with the University's mission and expectations. These expectations have been established in order to protect a specialized environment conducive to learning which fosters integrity, academic success, personal and professional growth, and responsible citizenship.

Sexual and Racial Harassment

Sexual and Racial Harassment

It is the policy of Missouri University of Science & Technology that discrimination and harassment are unacceptable conduct, which will not be condoned.

Sexual harassment is defined as unwelcome sexual advances, requests for sexual favors, or other unwelcome verbal or physical conduct of a sexual nature which creates an offensive, intimidating or hostile environment.

Racism may be directed at an individual or group. It can be overt or subtle and is often manifested as racial harassment including the use of racial epithets or other racially based derogatory language or behavior which has the intended effect, or reasonably foreseeable effect of interfering unduly with the work or academic performance of another or creating a hostile, intimidating or offensive environment. The hostile environment standard also applies to harassment on the basis of race, color, national origin, religion, age and disability.

The University has procedures to deal with harassment complaints on an informal basis without having to file a formal grievance. The objective of informal resolution is to stop the unwelcome behavior. If informal resolution fails, you have the opportunity to file a formal grievance.

If you believe you have been subjected to harassing behavior, you are encouraged to discuss the matter with: the Vice Chancellor for Human Resources, Equity and Inclusion, who serves as the Chief Equity Officer and Title IX Coordinator, 113 Centennial Hall, 341-4920; the Office of the Dean of Students, 107H Norwood Hall, 341-4209; or Counseling, Disability Support, and Student Wellness, 204 Norwood Hall, 341-4211.

Students, staff, and faculty have a responsibility to work together to make the University a bias-free educational and living environment. We can achieve this goal by expanding our multicultural perspective of the world and by treating all fellow students and members of the campus community with equal respect.

- E. **Dating/Intimate Partner Violence.** Violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the recipient of the violent behavior.
- F. **Sexual Exploitation.** Sexual exploitation occurs when one person takes nonconsensual or abusive sexual advantage of another person for his/her own advantage or benefit or for the advantage or benefit of anyone other than the person being exploited and which behavior does not constitute any other form of sexual misconduct. Examples of sexual exploitation include, but are not limited to, the following activities done without the consent of all participants:
- 1) Invasion of sexual privacy;
 - 2) Prostituting another person;
 - 3) Taping or recording of sexual activity;
