The Division of Student Affairs at Missouri S&T is committed to operational excellence, constantly assessing usage, satisfaction, and learning achieved through our programs and services. As part of that process, we have attempted to provide visual representations of the information gathered by the departments within the division. We have not attempted to construct an all-encompassing package of information, as that would not be amenable to a dashboard presentation. We have also not tried to “cherry pick” information presented on the dashboard. Rather, we strategically selected information that is most representative of the basic services and programs offered in each department for ourselves, our students, and external constituents. As our assessment program continues to mature, the dashboard may well expand further. However, we hope to maintain it in a user-friendly manner that makes information readily accessible. Should you have questions about any information that is provided within the dashboard, please contact the Office of the Vice Chancellor for Student Affairs at stuaff@mst.edu or 573-341-4292.
