Partnering for Lifelong Success

Making A Difference. Missouri S&T believes that students benefit from conversations with their parent(s) or legal guardian(s) pertaining to alcohol and controlled substance use. As advocates partnering to develop creative thinkers and leaders, you can contribute to the success of your student by having a discussion and reviewing the Alcohol and Controlled Substance Policy and Procedures online module with your son or daughter.
Missouri S&T students, under the age of 21, are less likely to consume alcohol than other Missouri college students - 32% of S&T students, under the age of 21, choose not to consume alcohol.

Most S&T students refrain from making risky decisions - Of students who consume alcohol, 90% drink slowly instead of chugging and 96% choose not to drive or ride with someone who has consumed alcohol. Most S&T students choose not to binge drink and 97% do not use fake IDs.

Missouri S&T students look out for one another - 96% of S&T students say they would step in and do something if a friend was drinking too much.

Data from: 2013 Missouri College Health Behavior Survey

Dear Missouri S&T Family Member:

The faculty and staff of Missouri University of Science and Technology are committed to providing an inclusive, vibrant and sustainable campus community where student learning and development flourish. At the heart of this commitment is an emphasis on practical, applied learning in an environment that promotes discovery, creativity and innovation for lifelong success. Aligned with this commitment is the Parental Notification of Alcohol and Controlled Substances Violations policy, which allows for increased collaboration with parent(s) or legal guardian(s) regarding issues pertaining to student use of alcohol or controlled substances.

At Missouri S&T, we believe students benefit from discussions with their parent(s) or legal guardian(s) about the effects of alcohol and/or controlled substance use, including the impact on their educational and professional experience. As our partner, we encourage you to discuss and complete the Parental Notification online module with your student. This module is accessible from the Student Affairs website at stuaff.mst.edu by clicking on the ‘Parental Notification Module’ button in the top, right corner.

Finally, please encourage your student to complete the eCHECKUP TO GO module, which will be distributed to his or her University e-mail account later this month. This module is designed to assist students in making informed choices regarding the consumption of alcohol.

Warmest regards,

Cheryl B. Schrader
Chancellor
